The Class Data Collection

Help your class get to know one another while practicing data collection with this set of 7 graphs and 2 tally charts. Spend a few minutes with these activities each day and then turn them into a great display for Open House! When you take the display down, assemble the pages into a book for your classroom library, using the included cover.

Teacher Directions: Print graphs and tally charts in color on cardstock. Laminate if desired to use year after year. To complete, have children write their initials in a box or color it.

I hope that you'll enjoy using this free item with your class! Please take a look at more freebies and other products for primary math and literacy at <http://www.teacherspayteachers.com/Store/Linda-Nelson/Products>
